Simplifying fans' mobility

GUNNEBO®
For a safer world

Simplifying fans' mobility

Modern sports facilities have become multi-functional complexes integrating commercial, retail, dining and entertainment spaces where comfort, safety and security are helped by on-going advances in technology.

This is precisely where Gunnebo can create overall security solutions, realising the visions of "Simplifying fans' mobility" down to the smallest detail - not least by ensuring reliable, trouble-free interaction with security staff and security systems at all times.

Gunnebo is at the very forefront of Entrance Control technology supplying solutions that reach beyond today's demands for both fans and security staff, creating secure environments without compromising freedom of movement.

Gunnebo, through many years of global experience has gained extensive knowledge within the stadia and arena sector to derive a range of facility gates suitable to withstand the rigours of use; combining heavy passenger throughput, the need for reliability, robustness, and prevention of unauthorised access.

This is achieved through intelligent design, offering high efficiency operation with minimum service needs and low running costs, all of which helps to protect the operator's capital investment and future operational costs.

Gunnebo has the ability to offer sport gates from either a standard portfolio, or a fully customised package to suit the customer's specific requirements; including cabinet aesthetics, functionality and firmware interfacing with the operator's ticketing and access control system.

- Gunnebo's vision: **Simplify fans' mobility**
- 100 years experience
- More than 150 references worldwide
- Purpose-built product range
- Close partnership with main ticketing and venue management solution suppliers
- Solutions aiming at multi-functional complexes

VIP Access

Public Access

Visitor Access

It's all about simplifying fans' mobility.

» PUBLIC ACCESS

SlimStile EV Stadia

Tripod Turnstile for Stadia Application

When it comes to main public access to the arena, the event organisers are faced with a major challenge. Modern sports arenas see their number of fans increasing. The requirement is that public entry must get quicker, but the answer is not to simply add additional ground staff, as this will increase operating overheads due to space reduction.

The SlimStile EV Stadia by Gunnebo offers a well-designed, two-legged casework made of stainless steel, ideal for sites where large flows of people and robustness are issues. The SlimStile EV accelerates the complete entry process. The gate makes the process smoother for the fans and simpler for the staff.

Security can also be increased by adding the ATT (Alarmed Tripod Turnstile) system which offers the best security performances by means of a photocell and IR sensor alarming in case of unauthorised passage attempt.

The SlimStile EV Stadia interfaces with most modern-day advanced stadium access and ticketing solutions available.

Benefits

- Accelerates and standardises fans' throughput
- Minimises queues and queuing time
- Prevents overcrowding in all sections of the stadium
- Reduces operational costs and removes human error
- Minimises staffing levels
- Increases security with single passage detection
- Best monitoring of events thanks to a complete integration with access control system

» VISITOR ACCESS

RotaSec Stadia

Full-Height Turnstiles for Stadia Application

For sensitive public access to the arena such as visitor access, it requires an increased security for best crowd management. Some stadia are aiming at enhancing fans' security while ensuring effective physical control to all entrances or sensitive areas.

The RotaSec Stadia by Gunnebo offers a robust trouble-free full-height turnstile with a full side frame, roof with canopy, flush mounted down lights, rainwater downpipe, plain lateral sides and passage direction red/green status lights. The RotaSec Stadia prevents two passages at one time in a silent and smooth operation.

Available in single and double interlocking layout configurations for sites where space is an issue, the RotaSec Stadia can be customised to the football club's main colours for example.

The RotaSec Stadia interfaces with most modern-day advanced stadium access and ticketing solutions available.

Benefits

- Specially designed to meet security and safety stadium requirements
- Increases security with integrated technology and single passage detection
- Prevents trouble-makers from gaining unauthorised access
- Best integration and protection of stadium access and ticketing solutions
- Reduces operational costs and removes human error
- Choice of rotor designs, finishes and colours
- Best monitoring of event thanks to a complete integration with access control system

Turnstile for VIP Application

Every stadium that aspires to host a major sporting event has to provide VIPs with the best corporate hospitality facilities. These require different security and access requirements and conditions.

Gunnebo provides a full range of turnstiles with high design finish together with effective security features. Gunnebo offers a large range of possible personalisation and options.

Flap-Gates by Gunnebo offer a unique glass and stainless steel design that allows it to incorporate seamlessly into most areas and helps minimise the barrier effect.

Entrance Gates by Gunnebo are designed to combine smooth function and sophisticated appearance with security needs in settings where design is important. They are designed to reduce the barrier effect and create a welcome atmosphere.

Benefits

- Aesthetic and high security solution for luxury/private suite concept
- Range of modern designs with a choice of styles and widths
- Restrain and control access to restricted areas such as VIP
- Extra-wide models available for disabled access
- Emergency settings to allow for safe evacuation
- Combine smooth operation with uncompromised security

Ensuring Value and Optimum Performance

With years of experience delivering security solutions, we know how to create value for you and your business. That is why we have made Services an integrated part of our business.

It is essential that access systems are always up and running to facilitate fans' throughput. When crowd capacity is at its maximum on match days or large events, ease of movement then becomes critical. Gunnebo Preventive Maintenance ensures optimal performance of your entrance control systems for years to come minimising disruption in those moments.

In the case of an unexpected downtime, Gunnebo Corrective Maintenance contract offers emergency support with several options of Response Time commitment adapted to your specific requirements.

At every stage of our relationship with you – from the first meeting through to delivery, installation and after-sales support – we will act as your security partner, listening to and addressing your security needs.

Benefits

- Global presence in 31 countries and more than 100 markets via partners
- Better conservation of equipment and increased lifespan
- Minimise disruption in critical moments
- Simplicity: Just call and we will be there
- Fast response time with SLA commitment
- Certified Partner in ISO 9001
